 View My Portfolio

Profile

A full stack developer proficient in React, React Native Node.js, MongoDB, etc. I'm passionate about creating seamless user experiences that meet user requirements.

Professional Experience

Royacare Agency, United Kingdom

Oct 2024 – present

Software Engineer (Remote)

England, England

As a Software Engineer At Royacare My Responsibilities include the Development of Secure Hospital Management Portals to Track and Manage Staff and Patient Records, Manage staff Appointments, Keep Track of Patient Vitals, Recruitment Management, e.t.c

Omega, United Kingdom

Jan 2024 – May 2024

Backend Developer (Remote)

England, London

As an Backend Engineer at Omega on the card funding service team at omega, my role was to design and implement technical solutions and secure protocols to ensure an efficient and secure processing of card funding transactions. I developed, maintained and integrated various software applications with external systems and i helped my development team to troubleshoot issues that arose during card funding processes

- I designed and implemented APIs to support frontend functionalities.
- I optimized processes for accounting features, significantly reducing processing time and website load time
- I also implemented various error handling mechanisms to ensure a seamless user experience

Technology Used: NodeJs, Google Cloud Platform, GRPC, Typescript & NextJs

Company Link: <https://omg.one>

Frontend Developer (intern) At Nigerian Shippers' Council

May 2023 – Nov 2023

- Developed and deployed fullstack web applications using TypeScript, and MongoDB.
- Leveraged TypeScript to ensure type safety and improve code quality, enhancing the maintainability and scalability of the web applications.
- Managed deployment processes on Google Cloud Platform, vercel, etc. ensuring high availability and performance of the web applications.
- Implemented MongoDB for efficient data storage and retrieval, optimizing database performance and scalability.

Nigeria
